Computer Tools for Invasive Species Management

Land Use Brownbag Series

Wednesday, June 29
GEF2 in G09
11:45-12:30

Come learn about computer tools for invasive species management. We'll take you on a guided tour of **DNR's new invasive species portal** organized in one central location to make finding information across programs easy.

Also learn about Great Lakes Indian Fish & Wildlife Commission's **Exotic Plant Information Center** that includes, among other online resources, interactive mapping of purple loosestrife and leafy spurge in the Great Lakes Basin.

For more information about the brownbag series or Computer Tools for Planning, Conservation, and Environmental Protection contact Dana Lucero 608-266-5227 or dana.lucero@dnr.state.wi.us
